

BookingService::cancelBooking

BookingService::updateBooking
Status

Booking::setStatus

```
graph LR; A[BookingService::cancelBooking] --> C[Booking::setStatus]; B[BookingService::updateBooking Status] --> C;
```

The diagram illustrates a dependency or call relationship. On the left, two white rectangular boxes represent methods from the BookingService class: 'cancelBooking' and 'updateBooking Status'. On the right, a gray rectangular box represents the 'setStatus' method of the Booking class. Two blue arrows point from the right side of each BookingService method box to the left side of the Booking::setStatus box, indicating that both service methods invoke the setStatus method on a Booking object.
