

UserRepository::add

UserRepository::remove

UserRepository::update

UserRepository::convertUser
ToCsv

```
graph LR; A[UserRepository::add] --> D[UserRepository::convertUserToCsv]; B[UserRepository::remove] --> D; C[UserRepository::update] --> D;
```

The diagram illustrates a mapping or transformation. On the left, three white rectangular boxes are stacked vertically, each containing a method name: 'UserRepository::add', 'UserRepository::remove', and 'UserRepository::update'. On the right, a single, wider grey rectangular box contains the text 'UserRepository::convertUser' on the top line and 'ToCsv' on the bottom line. Three blue arrows originate from the right side of each white box and point towards the left side of the grey box, indicating that each of the three methods on the left is associated with or transformed into the single method on the right.
